

Power Standards Lab ATT1-1200V-AC-DC Voltage Attenuator 1200VDC-600VAC

PQube Plug-in Modules and Accessories

Compact voltage attenuator module for connection to PQube's analog channels. Great for DC data centers and other applications where high voltage DC monitoring is required. Can also be used to monitor high voltage AC.

- $\pm 1200\text{VDC}$ or 600VAC , CAT IV
- Over 15 kilovolts of isolation to protect against faults
- High voltage terminals are standard shrouded safety banana jacks - on 0.75in centers, just like a digital voltmeter
- 5 meter shielded cable to permit location of module in high voltage area.
- Module dimensions: 4" x 2" x 1.5" (102mm x 51mm x 38mm)
